

QWICK KURB[®]

Replaces temporary asphalt curb separator dividing opposing traffic in construction zones

Compare QWICK KURB to TEMPORARY ASPHALT SEPARATOR:

QWICK KURB[®]

- Reusable again and again
- Fully portable – installed by hand or conveyor – no heavy equipment required
- Reboundable delineators are built-in & don't require glue
- Highly observable yellow color
- Super bright cat's eyes reflectors are built in
- "Quickly" installed in 1/3 the time of conventional asphalt curb (**Approx 100 LF/HR by hand or 1,200 LF/HR with Conveyor**)
- Easily and "Quickly" removed from the roadway
- No damage to roadway surface
- No damage to permanent roadway markings
- **Does not require anchoring to roadway surface!**

Temporary Asphalt Separator

- Usable one time, seldom recycled
- Requires asphalt laying equipment
- Delineators attached to the curb with epoxy require frequent replacement
- Inconsistent reflective temporary striping
- Requires temporary paint on roadway
- Slow, laborious installation requires lengthy lane closures
- Removal is slow, requires heavy equipment & may damage underlying new roadway
- Temporary paint removal scars the road
- Permanent striping/RPM's usually damaged
- Must pay for curb over and over
- Destruction precludes rental use
